

7/16/2011

A gorgeous west wind piped in at 1315 which delayed the start of the cruising class as the starting area got realigned with Mark N at Kings Point. IODs got sent off on a course to N followed by a leeward gate to leeward of the start line, twice around with a short windward leg to the finish pin. Tyler Steel had the Gambler in overdrive and blazed off their 4th win of the July series by picking off the shifts and protecting the better pressure on the right.

The second race had a freshening breeze with puffs to 20 and your RC set a scenic tour of Great Harbor Course with the tide ebbing strong on the full moon. The windward mark remained as N but the IOD Class tried some reaching over to the Islesford outside green can followed by a tighter reach to Bowden Ledge and back to the finish pin just to windward of Rice Point on Sutton Island. Unfortunately many boats had a slight bout of amnesia and forgot to respect a nun halfway up the beat. Protests were filed and those competitors acknowledged their error and withdrew. Mischief stole one from Gambler in a squeaky tight finish.

Andrew Kimball and Katherine Bienkowski worked the mark boat this afternoon and Bardy Roberts along with Tucker Charles assisted Sue and Franny on the Shearwater. We had a whole lot more fun with our much louder new ammo supply for the cannon, too.

Looking forward to hearing more from the players..... And, don't forget to send a contribution to Hospice of Hancock County if you have not already done so. Address is available from the tab on the NEHFleet web site.
